TECHNICAL SKILLS

LANGUAGES

Python · TypeScript · JavaScript · SQL · HTML · CSS

AI / ML

RAG · LLM Eval (RAGAS) · Multi agent · Vector DBs · LangChain · LangGraph · PyTorch · scikit-learn · OpenCV

FRAMEWORKS

FastAPI · Next.js · React · Tailwind · Streamlit · REST · JWT

TOOLS

Git · Linux · Docker · CI/CD · PostgreSQL · ChromaDB · FAISS · pgvector · Groq · Gemini · OpenAI

LANGUAGES

English	Fluent
Urdu	Fluent
Punjabi	Native

PROFILE

AI engineer focused on production LLM systems, RAG pipelines, evaluation frameworks, and full-stack AI products built with FastAPI and Next.js. Shipped 16+ projects spanning legal tech, HR AI, multi-agent research, and computer vision, owning each system end to end from retrieval design through deployment and observability.

WORK EXPERIENCE

AI Engineer Intern

Jun – Jul 2026

TEYZIX CORE · Remote

- Built a legal tech contract risk analyzer: 7 stage async pipeline extracting clauses, flagging risk with confidence scores, and computing an explainable compliance score via RAG over ChromaDB.
- Built TEYZIX summarizer combining extractive scoring (TF-IDF, positional) with abstractive BART, multi document batching, and auto detection across 16+ languages.

AI Developer Intern

Mar – May 2026

Punjab Skill Development Authority (PSDA) · Remote

- Sole engineer delivering a full-stack SaaS platform (Next.js + Tailwind + PostgreSQL) from Figma to production, including public site, admin dashboard, and a 3 role permission system across 8+ REST endpoints.
- Built an OCR document parser using Gemini API to extract and structure text from multi page uploads.

Software Engineer Intern

Sep 2025 – Nov 2025

Artificial Automation Business Solutions (AABS) · Remote

- Built a RAG PDF chatbot with embedding model selection, ChromaDB indexing, and grounded retrieval, improving answer grounding over a keyword search baseline.
- Developed responsive SaaS dashboard in Next.js 15 / React 19 / TypeScript with auth, analytics visualizations, and subscription management.

EDUCATION

BSc Artificial Intelligence

2024 – 2028

Superior University, Lahore

5th semester. ML, Deep Learning, Computer Vision, NLP, Linear Algebra, Data Structures & Algorithms.

PROJECTS

Quality Eval PDF Chatbot

LLM EVAL

Production RAG with RAGAS quality gate, hybrid search (dense + BM25 + reranking), and Prometheus observability.

FastAPI Next.js ChromaDB Groq

Research Agent Swarm

MULTI-AGENT

LangGraph multi-agent system with DAG planning, parallel specialist agents, and self auditing citations.

LangGraph Groq FastAPI React Flow

Legal Doc Risk Analyzer

LEGALTECH

7 stage async pipeline for contract analysis with OCR, clause extraction, RAG Q&A, and compliance scoring.

FastAPI Next.js ChromaDB OCR

RecruitAI Screener

HR TECH

Explainable resume screening on a 100-point scale with ChromaDB semantic skill matching and CSV export.

FastAPI Next.js Groq ChromaDB

Agentic RAG Chatbot

RAG

Multi query RAG with SSE token streaming, JWT workspaces, and page level citations over pgvector.

FastAPI Next.js pgvector Groq

Hadith Chatbot

NLP

39k authenticated Hadiths via BM25 → FAISS two-stage retrieval with bilingual attribution.

Flask FAISS LangChain Groq
